Career Interest Assessment Report

Dear Ashwini(86666891),

Thank you for playing the Career Interest assessment tool designed to identify the career most suitable for you. The Interest Inventory Assessment is designed to identify the jobs or career most suitable for a person.

A person's interest in a particular work environment classifies him/her into a personality type or a Holland Code. The Holland Code refers to a theory of careers and vocational choice (based upon personality types) that was initially developed by American psychologist John L. Holland (1919-2008)

It works on the premise that people work best and flourish in work environments that match their personality. (Please turnover to find a brief description of the personality types.

Research has proved that there is a link between a person's personality and his/her choice of profession.

A person with a personality type/Holland code AEC , is expected to flourish in the following career or professions:
1. Arts and A/V Technology & Communications 2. Hospitality & Tourism 3. Human Services 4. Marketing and Sales

Please note that the career choices suggested are indicative of a person's interest and not reflective of his/her capability. There could be more of such similar professions that the person may choose to follow.

We hope that this assessment helps you identify a career of your interest. All the best for your journey!
